 Safety standard :  
 ○Standard for Protective Helmets  
 (Ministry of Health, Labour and Welfare of Japan)

Standard Attachment

- Chin strap
- Impact absorption liner
- EPA Buckle System

Color : ○ W-1 ○ B-4

Optional : Decoration sticker

Double layer structure

### Excellent Ventilation

The ST#1820/1830-FZ helmet is unique for its superior ventilation and excellent sweat absorption abilities. A total of 11 ventilation holes are situated in the front portion of the helmet permitting fresh air to pass through the helmet and cool the users head. In addition, ventilation holes are located on the top of the helmet (ST#1820 = 6 holes / ST#1830 = 3 holes) and ventilation holes are situated at the back allowing heat to be released effectively. (ST#1820 = 5 holes / ST#1830 = 6 holes) In order to achieve this degree of ventilation the helmets original double layer structure was created. The inner shell enables the ventilation holes to be above the standard sizes of other existing helmets while the outer shell acts to protect the user from falling objects. A further unique feature is the inside absorption liner which unlike other helmets is positioned away from the shell to allow and heat or humidity within to be released easily and rapidly.

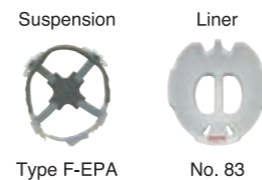

Incorporates a rain channel & transparent peak for wide views

### ST#1830-FZ

Material : Shell : A.B.S / Peak : PC  
 Weight : 445g  
 Safety standard :  
 ○Standard for Protective Helmets  
 (Ministry of Health, Labour and Welfare of Japan)

Standard Attachment

- Chin strap
- Impact absorption liner
- EPA Buckle System

Shell ABS / Peak PC
